Development Policy, USA

Silvia Ribeiro
Action Group on Erosion, Technology and
Concentration, Mexico

Dena Hoff
National Family Farmers Coalition, USA

Andrianna Natsoulas,
Critical Mass, Energy and Environment
Program, Public Citizen USA

Join this discussion on free trade, new technologies and the future of agriculture.

New technologies, such as nanotechnology, food irradiation and genetically modified organisms are critical to create a corporate-controlled global food system. Neo liberal policy tools have already hurt local and regional economies, and that must stop.

Co-sponsored by Public Citizen, Action Group on Erosion, Technology and Concentration and Asia Pacific Network on Food Sovereignty
