England, Wales, Northern Ireland

Antonio Tujan
IBON Foundation, The Philippines

Pat Mooney
Action Group on Erosion, Technology and
Concentration, Mexico

Nadège Adam
Council of Canadians, Canada

Join this discussion on free trade, new technologies and the future of agriculture.

New technologies, such as nanotechnology, food irradiation and genetically modified organisms are critical to create a corporate-controlled global food system. Neo liberal policy tools have already hurt local and regional economies, and that must stop.

Sponsored by Public Citizen, Action Group on Erosion, Technology and Concentration and Asia Pacific Network on Food Sovereignty, Institute for Agriculture and Trade Policy
