

Worldwide Events Around the 4th WTO Ministerial in Qatar

Hundreds of events are planned in national capitals and other cities around the world to coincide with the 4th Ministerial of the World Trade Organization (WTO). Choosing Doha, Qatar as the site for the Ministerial in part was designed to avoid public participation and scrutiny. Civil society is severely restricted in terms of access to the Ministerial. The anti-corporate globalization movement that started in Seattle has only grown in depth, diversity and size since then. This movement cannot be silenced. More and more people around the world are living with the negative consequences of a cynical globalization agenda: lack of adequate healthcare; no access to schools; loss of livelihood and jobs; a deteriorating environment; elimination of family farms and weakening of food security and safety. If the proponents of the status-quo globalization model thought that locating the WTO Ministerial in Qatar could silence civil society they were wrong. Instead we have brought our voices and our WTO critique home to communities all over the world.
