

# Amend the Constitution to Prevent Corporate Control of Elections

The Supreme Court has ruled that corporations can spend as much money as they want promoting or attacking candidates for elected office. Join the movement for a constitutional amendment to keep corporations from taking over our democracy and to clarify that the First Amendment is for people, not corporations. Visit [www.DemocracysForPeople.org](http://www.DemocracysForPeople.org) to learn more.

We call upon the United States Congress to pass and send to the states for ratification a constitutional amendment to overturn the Supreme Court's disastrous *Citizens United* ruling, take democracy off the auction block, and preserve constitutional rights for people - not corporations.

*Signers will be added to our email list for action alerts and other communications about the work Public Citizen is doing to fight corporate power and hold government accountable to the people. You can unsubscribe from our email list at any time.*
