70-74 years	10	12	7
75 and older	6	8	4
Prefer not to answer	0	0	0

Q3. Just to make sure we have a representative sample, please choose one or more of these racial or ethnic groups that you identify with. RANDOMIZE CHOICES
Select all that apply

White or Caucasian	78	81	76
Black or African American	9	8	10
Latino/Latina or Hispanic	8	8	8
Asian American or Pacific Islander	3	2	4
Native or Indigenous American	2	1	3
Middle Eastern	1	1	1
None of these/Other	1	1	1

	TOTAL	MEN	WOMEN
N=	1500	694	798

Q4. In which state do you live?**Region**

Northeast	17	17	17
Midwest.....	23	23	23
South	36	35	36
West.....	24	24	24
 New England.....	5	5	5
Middle Atlantic.....	12	12	12
East North Central.....	16	16	16
West North Central.....	7	7	7
South Atlantic.....	21	21	21
East South Central	6	6	6
West South Central	9	9	9
Mountain	8	8	8
Pacific	16	16	16

Q5. What is the last year of schooling that you have completed?

High School Graduate or less	21	18	23
Post-HS.....	36	36	37
College graduate or post-grad	42	46	39
 1st -11th Grade	2	2	1
High School Graduate	19	16	22
Vocational or technical school.....	4	3	4
Some college but no degree	20	19	21
Associate degree.....	13	13	13
4-year college graduate or bachelor's degree	25	22	27
Graduate School or advanced degree.....	18	24	12
Prefer not to answer	1	1	0

Q6. How likely are you to vote in the election in November 2022 for Senate, Congress, and other offices -- are you almost certain to vote, will you probably vote, are the chances about 50-50, are you probably not going to vote, or are you definitely not going to vote?

Almost Certain.....	83	85	81
Probably.....	17	15	19
50 - 50	{TERMINATE}		
Probably not	{TERMINATE}		
Definitely not	{TERMINATE}		
(Don't know)	{TERMINATE}		

	TOTAL	MEN	WOMEN
N=	1500	694	798

Q7. Do you live in a city, a suburb near a city, a small town, or a rural area?

Large city	24	30	19
Smaller city.....	13	13	13
Suburb near a city	38	35	40
Small town.....	9	9	9
Rural area	16	13	18
Prefer not to answer	1	0	1

Q8. {SSA} How would you rate the job the Biden administration is doing on rolling out COVID-19 vaccines globally?

Excellent	32	36	28
Good	30	26	33
Just Fair	15	14	15
Poor	22	22	22
Not sure	2	2	2
Excellent /Good	61	62	61
Just fair /Poor	36	36	37

Q9. {SSB} Do you think the Biden administration is **[ROTATE]** __not doing enough to distribute COVID-19 vaccines globally OR __doing too much to distribute COVID-19 vaccines globally, or is it doing about the right amount?

Not enough.....	20	21	20
Too much	16	21	12
About the right amount	55	50	59
Not sure	8	8	9

Q10. Right now, do you think the US has a shortage of or not enough doses of COVID-19 vaccines, a surplus or too many doses, or about the right amount?

A shortage or not enough	11	12	9
A surplus or too many.....	39	42	36
About the right amount	41	39	43
Not sure	10	7	13

	TOTAL	MEN	WOMEN
N=	1500	694	798

Q11. Now for something slightly different. On a scale of 0 to 10 where 0 is not important at all and 10 is extremely important, how important is it that countries around the world have access to COVID-19 vaccines so their citizens can be quickly and efficiently vaccinated and protected from COVID-19?

Mean	8.6	8.5	8.7
10 – Very important	57	54	59
8 - 9.....	18	21	16
6 - 7.....	7	7	6
5	4	5	4
1 - 4.....	4	4	4
0 – Not at all important.....	3	2	3

Oppose	20	18	21

Q16. The US government has the ability to produce enough COVID-19 vaccines for low- and middle- income countries to vaccinate their people by investing in a worldwide vaccine manufacturing program, which would increase production of vaccines in the United States and also in manufacturing centers across the globe. Do you favor or oppose the US government investing in a worldwide vaccine manufacturing program, or are you not sure?

Strongly favor	50	52	47
Not so strongly favor.....	20	22	18
Not so strongly oppose	9	9	10
Strongly oppose	10	10	10

Q18. Here are two statements that have been made about the US government taking the lead in getting the world vaccinated. Please indicate which statement comes closest to your own view. {ROTATE 1-2, 2-1}

[Sharing knowledge and technology] The US is one of the countries leading in vaccination rates because we have the knowledge and technology to mass produce COVID-19 vaccines and administer them so shots get into people's arms. We need to share our knowledge and technology for vaccine development so we can help teach other countries to produce vaccines so they too can vaccinate their people.

This is a global pandemic, and it is only going to end if there is a global effort to get the world vaccinated. ... 37 34 40

[Other countries' responsibility] The US government is still working to vaccinate Americans, and the country is in recovery from the economic impacts of the pandemic. We need to focus on vaccinating Americans and protecting the intellectual properties of American companies so we can maintain our competitive edge. It is other countries' responsibility to control the pandemic within their own borders – we cannot afford to give away American knowledge and resources to bail out the rest of the world. 21

- a. {SSC} [Variants – Macro Impact] If we do not dramatically increase the rate and pace of getting vaccines into people’s arms globally, COVID-19 will continue to mutate and new variants that are more infectious, deadly, and resistant to existing vaccines will continue to spread. This could reverse progress made to control the pandemic, causing more illness, death, and economies around the world to shut down again. The United States has the capacity to take leadership and prevent the spread of new variants by investing in global vaccine manufacturing.

- b. {SSD} [Variants – Micro Impact] If we do not dramatically increase the rate and pace of getting vaccines into people’s arms globally, COVID-19 will continue to mutate and new variants that are more infectious, deadly, and resistant to existing vaccines will continue to spread. This will cause Americans’ lives to be put on hold again – people will lose jobs, face economic hardships, be forced to socially isolate, and risk more severe illness and death. The United States has the capacity to take leadership and prevent the spread of new variants by investing in global vaccine manufacturing.

- c. **{SSC} [Economic Impact]** Investing in a global vaccine manufacturing program is the best economic decision for the United States. This investment would pay for itself many times over by shortening the need for pandemic relief efforts which is costing billions in lost economic output. It would help put the global economy back on track by increasing trade and travel and helping people around the world return to work and school. For the US economy to recover here at home, we need to make sure the virus is under control abroad.

Very convincing	45	45	45

- d. **{SSD} [Equity]** No matter where we are from or what we look like, most of us work hard to provide for and protect our families. While here in America, we can now walk into the nearest pharmacy and get vaccinated for COVID-19, in other countries vaccine access is years away. Too many people across the globe are still vulnerable to catching and spreading COVID-19. It is time we come together, like we have in the past, to put an end to this pandemic.

Not convincing.....	19	19	18

- e. **{SSC} [Be Prepared – avoid another catastrophe]** We are still living through the COVID-19 pandemic, but scientists say it is only a matter of time before the next pandemic spreads across the world. So much of the death, pain, and suffering of the COVID-19 pandemic happened because we were not prepared. We can't afford to be unprepared again. If the US invests now in ramping up COVID-19 vaccine manufacturing, we will be better prepared for next time, saving countless lives and avoiding another catastrophe that could be far worse than this one.

- f. **{SSD} [Be Prepared – long term benefits]** Investing in preparation to combat global pandemics has many long-term benefits for the world, including tracking new health risks and responding quickly to protect the world, lessening economic damage, and advancing existing research into diseases and medical technology. The US should invest in vaccine manufacturing and share this technology with the rest of the world so we are better prepared to combat a virus like COVID-19 next time and get another pandemic under control much more quickly.

- g. **{SSC} [Increases Production]** By investing in global vaccine manufacturing, the United States would not take a single dose away from an American. In fact, it would increase the production of vaccines both in the United States and abroad, ensuring Americans can continue to get vaccinated and creating infrastructure to develop COVID-19 booster shots for years to come. An investment in a global vaccine manufacturing program will be the quickest and most effective way to reach herd immunity and end the pandemic, both in the US and around the world.

- h. **{SSD} [Humanitarian Crisis]** Americans and people who live in other wealthy countries are increasingly being vaccinated and returning to normalcy. But the COVID-19 virus is surging in poorer places like India and South America, with hundreds of thousands of new cases every day and death tolls reaching record highs. To end this pandemic and save countless lives, the US government can invest in expanding vaccine manufacturing capabilities around the world so people everywhere can get vaccinated. We won't be out of the pandemic until the entire world is vaccinated.

Q18. Here are two statements that have been made about the US government taking the lead in getting the world vaccinated. Please indicate which statement comes closest to your own view. {ROTATE 1-2, 2-1}

[Sharing knowledge and technology] The US is one of the countries leading in vaccination rates because we have the knowledge and technology to mass produce COVID-19 vaccines and administer them so shots get into people's arms. We need to share our knowledge and technology for vaccine development so we can help teach other countries to produce vaccines so they too can vaccinate their people.

This is a global pandemic, and it is only going to end if there is a global effort to get the world vaccinated. ... 37

44 39 29

[Other countries' responsibility] The US government is still working to vaccinate Americans, and the country is in recovery from the economic impacts of the pandemic. We need to focus on vaccinating Americans and protecting the intellectual properties of American companies so we can maintain our competitive edge. It is other countries' responsibility to control the pandemic within their own borders – we cannot afford to give away American knowledge and resources to bail out the rest of the world. 21

C21g.Increases production.....	44	62	40	25
D21f.Be prepared - Long term benefits.....	43	56	37	30

- a. **{SSC} [Variants – Macro Impact]** If we do not dramatically increase the rate and pace of getting vaccines into people’s arms globally, COVID-19 will continue to mutate and new variants that are more infectious, deadly, and resistant to existing vaccines will continue to spread. This could reverse progress made to control the pandemic, causing more illness, death, and economies around the world to shut down again. The United States has the capacity to take leadership and prevent the spread of new variants by investing in global vaccine manufacturing.

- b. **{SSD} [Variants – Micro Impact]** If we do not dramatically increase the rate and pace of getting vaccines into people’s arms globally, COVID-19 will continue to mutate and new variants that are more infectious, deadly, and resistant to existing vaccines will continue to spread. This will cause Americans’ lives to be put on hold again – people will lose jobs, face economic hardships, be forced to socially isolate, and risk more severe illness and death. The United States has the capacity to take leadership and prevent the spread of new variants by investing in global vaccine manufacturing.

N=	1500	691	189	601

- c. **{SSC} [Economic Impact]** Investing in a global vaccine manufacturing program is the best economic decision for the United States. This investment would pay for itself many times over by shortening the need for pandemic relief efforts which is costing billions in lost economic output. It would help put the global economy back on track by increasing trade and travel and helping people around the world return to work and school. For the US economy to recover here at home, we need to make sure the virus is under control abroad.

Very convincing	45	57	46	31

Not convincing.....	21	10	20	33

- d. **{SSD} [Equity]** No matter where we are from or what we look like, most of us work hard to provide for and protect our families. While here in America, we can now walk into the nearest pharmacy and get vaccinated for COVID-19, in other countries vaccine access is years away. Too many people across the globe are still vulnerable to catching and spreading COVID-19. It is time we come together, like we have in the past, to put an end to this pandemic.

Very convincing	47	61	40	34

Not convincing at all	8	1	14	13
Not sure	4	4	2	5
Convincing	77	87	73	68
Not convincing.....	19	9	25	26

- e. **{SSC} [Be Prepared – avoid another catastrophe]** We are still living through the COVID-19 pandemic, but scientists say it is only a matter of time before the next pandemic spreads across the world. So much of the death, pain, and suffering of the COVID-19 pandemic happened because we were not prepared. We can't afford to be unprepared again. If the US invests now in ramping up COVID-19 vaccine manufacturing, we will be better prepared for next time, saving countless lives and avoiding another catastrophe that could be far worse than this one.

			IND	
	TOTAL	DEM	/DK	REP
N=	1500	691	189	601

- f. **{SSD} [Be Prepared – long term benefits]** Investing in preparation to combat global pandemics has many long-term benefits for the world, including tracking new health risks and responding quickly to protect the world, lessening economic damage, and advancing existing research into diseases and medical technology. The US should invest in vaccine manufacturing and share this technology with the rest of the world so we are better prepared to combat a virus like COVID-19 next time and get another pandemic under control much more quickly.

Convincing	76	89	72	64
Not convincing.....	18	7	20	30

- g. **{SSC} [Increases Production]** By investing in global vaccine manufacturing, the United States would not take a single dose away from an American. In fact, it would increase the production of vaccines both in the United States and abroad, ensuring Americans can continue to get vaccinated and creating infrastructure to develop COVID-19 booster shots for years to come. An investment in a global vaccine manufacturing program will be the quickest and most effective way to reach herd immunity and end the pandemic, both in the US and around the world.

Very convincing	44	62	40	25

Not convincing.....	18	8	22	29

- h. **{SSD} [Humanitarian Crisis]** Americans and people who live in other wealthy countries are increasingly being vaccinated and returning to normalcy. But the COVID-19 virus is surging in poorer places like India and South America, with hundreds of thousands of new cases every day and death tolls reaching record highs. To end this pandemic and save countless lives, the US government can invest in expanding vaccine manufacturing capabilities around the world so people everywhere can get vaccinated. We won't be out of the pandemic until the entire world is vaccinated.

Q8. {SSA} How would you rate the job the Biden administration is doing on rolling out COVID-19 vaccines globally?

Excellent	32	8	54
Good	30	21	38
Just Fair	15	20	8
Poor	22	48	0
Not sure	2	3	0
Excellent /Good	61	28	92
Just fair /Poor	36	69	8

Q9. {SSB} Do you think the Biden administration is **[ROTATE]** __not doing enough to distribute COVID-19 vaccines globally OR __doing too much to distribute COVID-19 vaccines globally, or is it doing about the right amount?

Not enough.....	20	26	14
Too much	16	25	10
About the right amount	55	37	71
Not sure	8	11	5

Q10. Right now, do you think the US has a shortage of or not enough doses of COVID-19 vaccines, a surplus or too many doses, or about the right amount?

A shortage or not enough	11	12	10
A surplus or too many.....	39	38	40
About the right amount	41	38	44
Not sure	10	13	7

	TOTAL	TRUMP	BIDEN

Q11. Now for something slightly different. On a scale of 0 to 10 where 0 is not important at all and 10 is extremely important, how important is it that countries around the world have access to COVID-19 vaccines so their citizens can be quickly and efficiently vaccinated and protected from COVID-19?

Mean	8.6	7.8	9.3
10 – Very important	57	42	69
8 - 9.....	18	21	16
6 - 7.....	7	9	4
5	4	7	1
1 - 4.....	4	5	3
0 – Not at all important.....	3	6	0
Not sure	8	10	6
6 - 10 – Important	81	72	89
5 /NS.....	12	17	8
0 - 4 – Not important.....	7	11	3

Q12. On a scale of 0 to 10 where 0 is it does not impact safety in the US at all and 10 is it has a great impact on safety in the US, how much do vaccination rates in other parts of the world impact the safety of people here in the United States?

Mean	7.9	7.0	8.6
10 – Great impact	36	27	45
8 - 9.....	26	23	28
6 - 7.....	12	13	11
5	7	11	4
1 - 4.....	5	8	3
0 – No impact at all.....	3	6	1
Not sure	10	12	7
6 - 10 – Impact	75	63	85
5 /NS.....	17	23	11
0 - 4 – No impact	8	15	4

Q13. Which statement comes closer to your view, even if neither is exactly right? {ROTATE 1-2, 2-1}

The US should play an active role in the global distribution of COVID-19 vaccines and provide funding to ensure people around the world have access to the vaccines	42	28	53
The US should let the rest of the world take care of themselves and focus on ensuring all Americans have access to COVID-19 vaccines.....	20	33	11

Q18. Here are two statements that have been made about the US government taking the lead in getting the world vaccinated. Please indicate which statement comes closest to your own view. {ROTATE 1-2, 2-1}

[Sharing knowledge and technology] The US is one of the countries leading in vaccination rates because we have the knowledge and technology to mass produce COVID-19 vaccines and administer them so shots get into people's arms. We need to share our knowledge and technology for vaccine development so we can help teach other countries to produce vaccines so they too can vaccinate their people.

This is a global pandemic, and it is only going to end if there is a global effort to get the world vaccinated. ... 37 29 45

[Other countries' responsibility] The US government is still working to vaccinate Americans, and the country is in recovery from the economic impacts of the pandemic. We need to focus on vaccinating Americans and protecting the intellectual properties of American companies so we can maintain our competitive edge. It is other countries' responsibility to control the pandemic within their own borders – we cannot afford to give away American knowledge and resources to bail out the rest of the world. 21 27 16

D21f.Be prepared - Long term benefits.....	43	27	56

- a. **{SSC} [Variants – Macro Impact]** If we do not dramatically increase the rate and pace of getting vaccines into people’s arms globally, COVID-19 will continue to mutate and new variants that are more infectious, deadly, and resistant to existing vaccines will continue to spread. This could reverse progress made to control the pandemic, causing more illness, death, and economies around the world to shut down again. The United States has the capacity to take leadership and prevent the spread of new variants by investing in global vaccine manufacturing.

	TOTAL	TRUMP	BIDEN
N=	1500	615	757

- c. **{SSC} [Economic Impact]** Investing in a global vaccine manufacturing program is the best economic decision for the United States. This investment would pay for itself many times over by shortening the need for pandemic relief efforts which is costing billions in lost economic output. It would help put the global economy back on track by increasing trade and travel and helping people around the world return to work and school. For the US economy to recover here at home, we need to make sure the virus is under control abroad.

Not convincing at all	8	15	2
Not sure	5	5	4
Convincing	74	62	87
Not convincing.....	21	33	9

- d. **{SSD} [Equity]** No matter where we are from or what we look like, most of us work hard to provide for and protect our families. While here in America, we can now walk into the nearest pharmacy and get vaccinated for COVID-19, in other countries vaccine access is years away. Too many people across the globe are still vulnerable to catching and spreading COVID-19. It is time we come together, like we have in the past, to put an end to this pandemic.

Very convincing	47	30	61
Somewhat convincing.....	30	35	26

- f. **{SSD} [Be Prepared – long term benefits]** Investing in preparation to combat global pandemics has many long-term benefits for the world, including tracking new health risks and responding quickly to protect the world, lessening economic damage, and advancing existing research into diseases and medical technology. The US should invest in vaccine manufacturing and share this technology with the rest of the world so we are better prepared to combat a virus like COVID-19 next time and get another pandemic under control much more quickly.

- g. **{SSC} [Increases Production]** By investing in global vaccine manufacturing, the United States would not take a single dose away from an American. In fact, it would increase the production of vaccines both in the United States and abroad, ensuring Americans can continue to get vaccinated and creating infrastructure to develop COVID-19 booster shots for years to come. An investment in a global vaccine manufacturing program will be the quickest and most effective way to reach herd immunity and end the pandemic, both in the US and around the world.

- h. **{SSD} [Humanitarian Crisis]** Americans and people who live in other wealthy countries are increasingly being vaccinated and returning to normalcy. But the COVID-19 virus is surging in poorer places like India and South America, with hundreds of thousands of new cases every day and death tolls reaching record highs. To end this pandemic and save countless lives, the US government can invest in expanding vaccine manufacturing capabilities around the world so people everywhere can get vaccinated. We won't be out of the pandemic until the entire world is vaccinated.

Q18. Here are two statements that have been made about the US government taking the lead in getting the world vaccinated. Please indicate which statement comes closest to your own view. {ROTATE 1-2, 2-1}

[Sharing knowledge and technology] The US is one of the countries leading in vaccination rates because we have the knowledge and technology to mass produce COVID-19 vaccines and administer them so shots get into people's arms. We need to share our knowledge and technology for vaccine development so we can help teach other countries to produce vaccines so they too can vaccinate their people.

This is a global pandemic, and it is only going to end if there is a global effort to get the world vaccinated. ... 37

38 31 33

[Other countries' responsibility] The US government is still working to vaccinate Americans, and the country is in recovery from the economic impacts of the pandemic. We need to focus on vaccinating Americans and protecting the intellectual properties of American companies so we can maintain our competitive edge. It is other countries' responsibility to control the pandemic within their own borders – we cannot afford to give away American knowledge and resources to bail out the rest of the world. 21

Q21. Here are some statements people have made in favor of investing in COVID-19 vaccine manufacturing globally. For each statement, please indicate whether you find it a very convincing, somewhat convincing, not too convincing, or not convincing at all of a reason for the US government to invest in a worldwide vaccine manufacturing program. [RANDOMIZE]

Sorted by “Very convincing”

D21f.Be prepared - Long term benefits.....	43	41	56	54

- a. {SSC} [Variants – Macro Impact] If we do not dramatically increase the rate and pace of getting vaccines into people’s arms globally, COVID-19 will continue to mutate and new variants that are more infectious, deadly, and resistant to existing vaccines will continue to spread. This could reverse progress made to control the pandemic, causing more illness, death, and economies around the world to shut down again. The United States has the capacity to take leadership and prevent the spread of new variants by investing in global vaccine manufacturing.

- b. {SSD} [Variants – Micro Impact] If we do not dramatically increase the rate and pace of getting vaccines into people’s arms globally, COVID-19 will continue to mutate and new variants that are more infectious, deadly, and resistant to existing vaccines will continue to spread. This will cause Americans’ lives to be put on hold again – people will lose jobs, face economic hardships, be forced to socially isolate, and risk more severe illness and death. The United States has the capacity to take leadership and prevent the spread of new variants by investing in global vaccine manufacturing.

- c. **{SSC} [Economic Impact]** Investing in a global vaccine manufacturing program is the best economic decision for the United States. This investment would pay for itself many times over by shortening the need for pandemic relief efforts which is costing billions in lost economic output. It would help put the global economy back on track by increasing trade and travel and helping people around the world return to work and school. For the US economy to recover here at home, we need to make sure the virus is under control abroad.

Not convincing.....	21	20	10	34

- d. **{SSD} [Equity]** No matter where we are from or what we look like, most of us work hard to provide for and protect our families. While here in America, we can now walk into the nearest pharmacy and get vaccinated for COVID-19, in other countries vaccine access is years away. Too many people across the globe are still vulnerable to catching and spreading COVID-19. It is time we come together, like we have in the past, to put an end to this pandemic.

Very convincing	47	47	54	53

Not convincing at all	8	8	8	7
Not sure	4	5	3	1
Convincing	77	77	85	76
Not convincing.....	19	18	12	23

- e. **{SSC} [Be Prepared – avoid another catastrophe]** We are still living through the COVID-19 pandemic, but scientists say it is only a matter of time before the next pandemic spreads across the world. So much of the death, pain, and suffering of the COVID-19 pandemic happened because we were not prepared. We can't afford to be unprepared again. If the US invests now in ramping up COVID-19 vaccine manufacturing, we will be better prepared for next time, saving countless lives and avoiding another catastrophe that could be far worse than this one.

	TOTAL	WHITE	BLACK	LATINX
N=	1500	1172	135	120

- f. **{SSD} [Be Prepared – long term benefits]** Investing in preparation to combat global pandemics has many long-term benefits for the world, including tracking new health risks and responding quickly to protect the world, lessening economic damage, and advancing existing research into diseases and medical technology. The US should invest in vaccine manufacturing and share this technology with the rest of the world so we are better prepared to combat a virus like COVID-19 next time and get another pandemic under control much more quickly.

Not sure	5	6	6	1
Convincing	76	75	84	76
Not convincing.....	18	19	10	22

- g. **{SSC} [Increases Production]** By investing in global vaccine manufacturing, the United States would not take a single dose away from an American. In fact, it would increase the production of vaccines both in the United States and abroad, ensuring Americans can continue to get vaccinated and creating infrastructure to develop COVID-19 booster shots for years to come. An investment in a global vaccine manufacturing program will be the quickest and most effective way to reach herd immunity and end the pandemic, both in the US and around the world.

Very convincing	44	45	52	30

Not convincing.....	18	18	11	32

- h. **{SSD} [Humanitarian Crisis]** Americans and people who live in other wealthy countries are increasingly being vaccinated and returning to normalcy. But the COVID-19 virus is surging in poorer places like India and South America, with hundreds of thousands of new cases every day and death tolls reaching record highs. To end this pandemic and save countless lives, the US government can invest in expanding vaccine manufacturing capabilities around the world so people everywhere can get vaccinated. We won't be out of the pandemic until the entire world is vaccinated.

DEFINITIONS OF CREATED VARIABLES

PARTY ID

Democrat

Respondents who identify themselves as strong Democrats, not so strong Democrats, or as Independents who lean towards Democrats.

Indep/DK

Respondents who identify themselves as Independents or who don't know their party identification.

Republican

Respondents who identify themselves as strong Republicans, not so strong Republicans or as Independents who lean towards Republicans.

Indep. w/weak

Respondents who identify themselves as Independents or as not strong Republicans or not strong Democrats.

PARTY ID STRENGTH

Strong Democrat

Respondents who identify themselves as strong Democrats.

Weak Democrat

Respondents who identify themselves as not strong Democrats or as Independents who lean towards Democrats.

Weak Republican

Respondents who identify themselves as not strong Republicans or as Independents who lean towards Republicans.

Strong Republican

Respondents who identify themselves as strong Republicans.

EDUCATION

H.S./Less

Respondents who say they have a 1-11th grade or high school education.

Post H.S.

Respondents with some post high school education, such as technical or vocational school or some college education or an associate degree.

Non-college grad

Respondents who do not have a 4-year college or a bachelor's degree.

College graduate or post-grad

Respondents with at least a 4-year college or bachelor's degree.

4-year College grad

Respondents with a 4-year college degree or bachelor's degree, but no post graduate education.

Post-graduate

Respondents with a graduate school or advanced degree.

MARITAL STATUS

All unmarried

Respondents who are unmarried with a partner, single, separated, divorced, or widowed.

REGION

New England

Respondents who live in Maine, New Hampshire, Vermont, Massachusetts, Rhode Island or Connecticut.

Middle Atlantic

Respondents who live in New York, New Jersey or Pennsylvania.

East South Central

Respondents who live in Tennessee, Alabama, Mississippi, or Kentucky.

West South Central

Respondents who live in Arkansas, Louisiana, Oklahoma, or Texas.

South Atlantic

Respondents who live in Delaware, Maryland, District of Columbia, West Virginia, North Carolina, South Carolina, Georgia, Virginia or Florida.

East North Central

Respondents who live in Michigan, Illinois, Indiana, Wisconsin, or Ohio.

West North Central

Respondents who live in Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, or Kansas.

Mountain

Respondents who live in Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah or Nevada.

Pacific

Respondents who live in California, Oregon, Washington, Alaska or Hawaii.

Northeast

Respondents who live in New England or the Middle Atlantic regions.

Midwest

Respondents who live in the East North Central or West North Central regions.

South

Respondents who live in the South Atlantic, East South Central, or West South Central regions.

West

Respondents who live in the Mountain or Pacific regions.

AREA LIVE IN

Urban

Respondents who say they live in either a large or smaller city.

Suburban

Respondents who say they live in a suburb near a city.

Rural

Respondents who say they live in either a small town or rural area.

RELIGIOUS ATTENDANCE

Often

Respondents who say they attend church at least once a week.

Sometimes

Respondents who say they attend church once or twice a month or several times a year.

Never

Respondents who say they attend church only on holidays or almost never/never.

VACCINATION STATUS

At least partially vaccinated

Respondents to Q22 who say they have received at least one dose of a COVID-19 vaccine or that they are fully vaccinated.

**13. US
ROLE IN GLOBAL VACCINE
DISTRIBUTION**

US active role

Respondents to Q13 who say the US should play an active role in the global distribution of COVID-19 vaccines.

World take care of themselves

Respondents to Q13 who say the US should let the rest of the world take care of themselves and focus on ensuring all Americans have access to COVID-19 vaccines.

Both

Respondents to Q13 who say the US should both play an active role in global vaccine distribution AND also focus on ensuring all Americans have access to COVID-19 vaccines.

14. PEOPLE IN LESS WEALTHY COUNTRIES BEING ABLE TO GET VACCINATED

Very concerned

Respondents to Q14 who say they are very concerned about people who live in less wealthy countries not being able to get vaccinated.

Concerned

Respondents to Q14 who say they are either very or somewhat concerned about people who live in less wealthy countries not being able to get vaccinated.

Not concerned

Respondents to Q14 who say they are either not too concerned or not concerned at all about people who live in less wealthy countries not being able to get vaccinated.

Not concerned at all

Respondents to Q14 who say they are not concerned at all about people who live in less wealthy countries not being able to get vaccinated.

16. VACCINE MANUFACTURING PROGRAM

Strongly favor

Respondents to Q16 who say they strongly favor the US government investing in a worldwide vaccine manufacturing program.

Favor

Respondents to Q16 who say they either strongly or not so strongly favor the US government investing in a worldwide vaccine manufacturing program.

Oppose

Respondents to Q16 who say they either strongly or not so strongly oppose the US government investing in a worldwide vaccine manufacturing program.

Strongly oppose

Respondents to Q16 who say they strongly oppose the US government investing in a worldwide vaccine manufacturing program.

SURVEY METHODOLOGY

Lake Research Partners designed and administered this online survey. The first survey fielded from July 7 to 12, 2021 nationwide and the 500 likely 2022 voters who completed this survey are included in the total base size. The second survey fielded from July 28 to August 1, 2021 and reached a total of 1,000 likely 2022 voters nationwide.

Survey respondents were drawn from an online panel of listed adults and screened to be likely 2022 voters. The base sample was weighted by race, race by gender, party identification, race by age, and urban city to reflect the actual proportion of likely 2022 voters nationwide.

The margin of error for likely voters is +/-2.5%. In interpreting survey results, all sample surveys are subject to possible sampling error; that is, the results of a survey may differ from those which would be obtained if the entire population were interviewed. The size of the sampling error depends upon both the total number of respondents in the survey and the percentage distribution of responses to a particular question. For example, if 50% of respondents in a sample of 1,500 adults answered “Yes” to a particular question, we can be 95% confident that the true percentage will fall within 2.5 points, or from 47.5% to 52.5%. The margin of error for subgroups is higher. The table below represents the estimated sampling error for different percentage distributions of responses.

**Margin of Error
for Different Percentage Distributions and Different Sample Sizes
(95% confidence)**

Sample Size	PERCENTAGES NEAR								
	10	20	30	40	50	60	70	80	90
