About Public Citizen

Public Citizen is a national non-profit organization with more than one million members and supporters. We represent consumer interests through lobbying, litigation, administrative advocacy, research and public education on a broad range of issues including consumer rights in the marketplace, product safety, financial regulation, worker safety, safe and affordable health care, campaign finance reform and government ethics, fair trade, climate change, and corporate and government accountability.

Introduction

Doug Burgum, a former technology CEO and North Dakota governor who got rich by selling his company to Microsoft, was an unusual choice to lead the Interior Department. The cabinet post is typically a fairly low-profile job, though it is an essential one. The agency manages about 20% of the nation's land, oversees relationships with federally recognized Native tribes and oversees both fossil fuel exploration and wind farms on offshore waters.

Burgum is an ambitious, wealthy man who vaulted himself into contention for a cabinet position in the second Trump administration by loaning nearly $15 million to his own short-lived 2024 presidential campaign. That campaign gave Burgum a spot on the national Republican primary debate stage, where he was the only GOP primary contender to gain a spot as a Trump cabinet secretary after briefly sparking talk as a potential vice presidential candidate.

As Interior Secretary, he has aggressively sought to redefine the job into a high-profile orchestrator of industry and government — often acting more like a Secretary of State or Commerce Secretary than an Interior Secretary. His agenda is packed with CEOs from the energy, finance and technology industries, but conservation and environmental nonprofits and tribal groups have received far less access.

Key Findings

To gain an in-depth understanding of Burgum's tenure as Interior Secretary, Public Citizen conducted an analysis of Burgum's publicly disclosed calendars for 2025. Public Citizen identified and catalogued 488 of Burgum's visitors in 2025, including meetings, events and dinners with external visitors, and categorized them by sector. The analysis of visitors **(Table 1)** — including companies, nonprofit organizations and tribes — listed on Burgum's public calendar found:

- 262 visitors (54%) from corporations, trade associations and their lobbyists
- 69 visitors (14%) from conservation, hunting, fishing and other nonprofit organizations
- 20 billionaires, including Microsoft co-founder Bill Gates and Google co-founder Sergey Brin
- 19 visitors (4%) from foreign governments
- 15 visitors (3%) from Native tribes and inter-tribal groups — fewer than several corporate sectors
- More than 17 times as many corporate visitors as tribal visitors

- Nearly four times as many corporate visitors as conservation visitors

Table 1: Analysis of Burgum's Visitors in 2025, By Sector

Category	External Visitors	Percentage
Corporate/Trade Association/Lobbyist	262	54%
Enviro/Conservation/Nonprofit	69	14%
State/Territory/Local	51	10%
Congress	41	8%
Government-Foreign	19	4%
Tribal	15	3%

Source: Public Citizen analysis of Doug Burgum's calendars. Data extracted from the Interior Department's calendars with artificial intelligence software. Note: Figures count calendar entries, rather than confirmed meetings. An entry may name one person, an organization, or a group event. Group events with multiple organizations were split into separate entries.

Burgum has been an enthusiastic champion of the nationwide artificial intelligence data center buildout who has touted data centers and artificial intelligence in speeches, podcast interviews and panel discussions around the country — and increasingly sought to build them on public lands.

Corporate visitors included executives from the largest Big Tech companies, many of which are making huge data center investments, including executives from Microsoft, Google, Amazon, Meta, Oracle and SpaceX, as well as financial industry titans from Blackstone, Citadel and many others. Top officials from the United Arab Emirates — Ambassador Yousef Al Otaiba and Sultan Al Jaber, UAE Minister of Industry and Advanced Technology and CEO of the Abu Dhabi National Oil Company — have entries on Burgum's calendar, as do officials from Canada, Italy and Greece.

Burgum did not disclose his calendars voluntarily, a pattern among high level Trump officials in both terms. The Interior Department only made the 2025 calendars public after a lawsuit by the Sierra Club and has not disclosed his calendars for 2026 so far.

This data should be viewed with some caveats. It does not provide a complete record of Burgum's activities or visitors, as some visitors on publicly reported international trips are notably absent. The

data also says little to nothing about the content of these meetings, and there is a chance that Burgum did not attend some of them. Some high-profile executives and investors may have multiple reasons to talk to a top cabinet official, including executives who have both a corporate agenda and a public lands or conservation agenda.

As was the case in the first Trump administration, these calendars visibly align with Burgum's policy goals of expanding oil and gas drilling, data centers on public lands, attacking renewable energy and even promoting coal as an energy solution. On several occasions, the meetings precede or coincide with major Trump administration policy changes, including an agreement to refund $928 million in lease payments to TotalEnergies to cancel an offshore wind farm, as well as pro-coal policies that could benefit the struggling coal company of Sen. Jim Justice (R-W.Va.) and his son, Jay Justice, both of whom met repeatedly with Burgum.

Table 2: Analysis of Burgum's Corporate Visitors in 2025, By Sector

Sector	External Visitors	Percentage
Oil & Gas	76	29%
Finance	34	13%
Technology	28	11%

Oil & Gas CEOs Get Access While Public Lands Suffer

Burgum has claimed to care "deeply" about conservation and public lands, but has consistently emphasized the purported need to let the private sector access more public resources. "We have western states that are being choked because they have so much public land and there's so much overreach by the federal government," Burgum said in 2025, while also accusing the Biden administration of "chasing an idealism around climate extremism."

Perhaps to Burgum's regret, the Interior Department is not a foreign policy agency, nor does it administer technology policy. In reality, the agency administers our national parks and public lands, including the Bureau of Land Management, which oversees 245 million acres, and the 85 million acres of the National Park System. Under Burgum, the Interior Department has aggressively moved to reduce resources for the parks system by making large cuts to national park staff, slashing park programs, planning to sell off public lands, rewriting historical displays and overseeing Trump's vanity construction projects in the nation's capital.

Burgum has longstanding and deep ties to the oil and gas industry, and his policy choices as Interior Secretary reflect these connections and relationships. Burgum has been intensely focused on what he calls "energy dominance." As chair of Trump's National Energy Dominance Council, Burgum and the NEDC's vice chair, Energy Secretary Chris Wright, have taken numerous controversial steps to maximize U.S. oil and gas production and exports. Those include citing "national security" to exempt Gulf of Mexico oil and gas drilling from the Endangered Species Act, pushing oil and gas drilling off the coast of California including the use of special wartime authority to force the restart of drilling on a platform that had been idle since 2015 due to a disastrous oil spill.

Burgum has been an emphatic advocate for exporting U.S. liquefied natural gas, meeting with U.S. energy firms that export gas around the world and traveling to Europe to meet with potential buyers. Burgum and Energy Secretary Chris Wright waved away concerns from former Energy Secretary Jennifer Granholm and other experts that ramping up exports of gas could drive up domestic gas prices and climate-warming emissions. "There are so many opportunities for participation by Greek companies and by the country of Greece to contribute to energy security for Eastern Europe," Burgum said in September 2025 at an energy conference in Athens.

Burgum talks to venture capitalist David Friedberg on a liquefied natural gas tanker at a methane export terminal in Louisiana.

Burgum's calendar shows repeated meetings, conferences and events with executives **(Table 3)** from the world's top oil and gas companies. Burgum has been especially focused on promoting gas drilling and pipeline construction in Alaska. The Interior Department in October 2025 reinstated a 2020 Trump decision to open 1.56 million acres of the Arctic National Wildlife Refuge to oil and gas drilling. Alaska's senators and Gov. Mike Dunleavy, all Republicans, appear repeatedly on his calendar. The Interior Department's top Alaska adviser, Kara Moriarty, previously was president and CEO of the Alaska Oil and Gas Association. During the first Trump administration, the group's current CEO, Steve Wackowski, was the top Alaska advisor for Interior. The oil and gas association has been pushing for fast-tracked drilling in Alaska, sparking criticism from Democratic lawmakers who said it would result in a "blatant giveaway of public lands to the oil and gas industry" that would gut environmental protections and tribal consultation.

Burgum has also been an enthusiastic backer of Trump's January 2026 military coup in Venezuela and effective takeover of the country's oil industry. "It is really nothing short of shifting the geopolitical center of the global energy markets away from chokepoints like the Middle East and moving it back to the Western Hemisphere," he said on *Fox Business*. Now, as Americans face soaring prices at the pump due to Trump's war in Iran, Burgum called the unpopular war a "gift to the world." Burgum deflected questions about high fuel prices, saying that "the prices in the prior administration were this high anyway."

ENERGY & ENVIRONMENT | GOVERNMENT & POLITICS

Burgum touts AI data centers, calls Iran war 'gift to the world' in speech to oil industry

Table 3: Key Oil and Gas Executives on Burgum's 2025 Calendar

Date	Executive	Title & Company
2/20/2025	Patrick Pouyanné	Chairman & CEO, TotalEnergies
2/20/2025	Wael Sawan	CEO, Shell
3/10/2025	Murray Auchincloss	CEO, BP
3/11/2025	Lorenzo Simonelli	Chairman & CEO, Baker Hughes
3/11/2025	Tom Jorden	Chairman, CEO & President, Coterra Energy
3/11/2025	Alan Armstrong	At the time, President & CEO, Williams Cos, Now U.S. Senator
3/11/2025	Justin Bird	CEO, Sempra Infrastructure
3/11/2025	Darren Woods	CEO, ExxonMobil
3/11/2025	Dan Ammann	Upstream Business President, ExxonMobil
3/11/2025	Yukio Kani	Global CEO, JERA
3/11/2025	Sultan Al Jaber	UAE Minister; CEO, ADNOC
3/11/2025	Mackie McCrea	Co-CEO, Energy Transfer
3/11/2025	Steve O'Rourke	CEO, Jera Americas
3/11/2025	Toby Rice	President & CEO, EQT
3/11/2025	Mike Sabel	CEO, Venture Global
3/12/2025	Mike Wirth	CEO, Chevron
3/18/2025	Ryan Lance	Chairman & CEO, ConocoPhillips
3/20/2025	Sultan Al Jaber	UAE Minister; CEO, ADNOC
3/21/2025	Kim Dang	CEO, Kinder Morgan

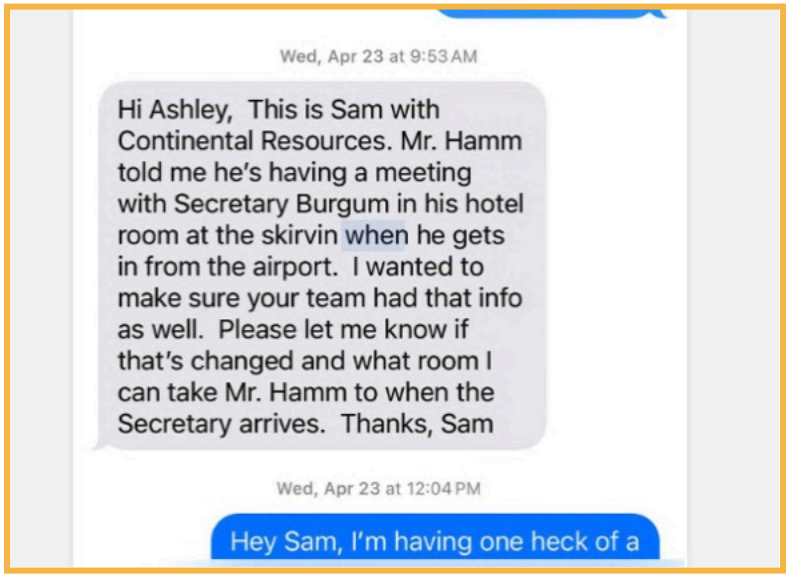

Date	Executive	Title & Company
3/21/2025	Tom Martin	President, Kinder Morgan
3/21/2025	Francois Poirier	President & CEO, TC Energy
4/23/2025	Clay Gaspar	President, Devon Energy
6/3/2025	Erec Isaacson	President, ConocoPhillips Alaska
6/16/2025	Sultan Al Jaber	UAE Minister; CEO, ADNOC
6/16/2025	Vicki Hollub	CEO, Occidental
7/31/2025	Chad Zamarin	President & CEO, Williams Cos.
9/9/2025	Patrick Pouyanné	Chairman & CEO, TotalEnergies
9/10/2025	Yukio Kani	Global CEO & Chairman, JERA
10/20/2025	Mike Sommers	President & CEO, American Petroleum Institute
10/30/2025	Chad Zamarin	President & CEO, Williams Companies

Source: Public Citizen analysis of Doug Burgum's calendars. Data extracted from the Interior Department's calendar with artificial intelligence software.

Trump, Burgum and Energy Secretary Chris Wright are all close allies of Harold Hamm, the Oklahoma oil driller who Trump has called his "original oil guy." Burgum leases his own land for oil exploration to Hamm's company, Continental Resources. It has prospered under the second Trump administration, with numerous regulatory and environmental rollbacks and specific Wyoming drilling permit decisions benefiting Continental. Most significantly, Continental Resources appears to be a key beneficiary of the U.S. invasion of Venezuela and takeover of the country's oil industry. Continental Resources signed a preliminary deal in September 2026 to develop a block of land in Venezuela, a deal announced at an energy summit with Burgum and Wright in attendance. Text messages obtained by the Sierra Club through a records request show a Hamm aide texting a Burgum aide in April 2025 to arrange a meeting with Burgum in an Oklahoma City hotel, an indication of this ultra-close relationship.

Burgum spoke at the "Powering AI Global Leadership Summit" at the Hamm Institute for American Energy at Oklahoma State University in April 2025.

An aide to Continental Resources founder and chairman Harold Hamm, a major Republican donor, texted with a Burgum aide before the Oklahoma State event. Source: FOIA documents posted by Sierra Club (Page 17)

All-In On Data Centers and Big Tech Execs

Like many Trump cabinet officials, Doug Burgum is a wealthy man who fully embraces Big Tech and the international corporate class. Burgum is one of 57 members of Trump's administration with a net worth of $100 million or more. In 2001, Microsoft acquired Burgum's company, Great Plains Software, for $1.1 billion. After the acquisition, Burgum stayed at Microsoft for several years running the software giant's business solutions division. Burgum also founded a North Dakota venture capital firm,

Arthur Ventures, with his nephew, James Burgum, and has ongoing investments in its funds. Burgum earned between $2.5 million and $15.1 million of capital gains in technology investments, according to a ProPublica report.

Burgum appeared on Fox Business to promote data centers.

Technology has little, if anything, to do with the Interior Department's mission. Nevertheless, Burgum and many other Trump administration officials have been cheerleaders for a massive expansion of an extremely lightly regulated sector that has spurred multiple warnings of an epic financial bubble that may pop in a spectacular fashion — if technology companies are unable to produce enough revenue to pay back debt taken on to build out data center capacity. Meanwhile, community opposition to massive data centers and limited electric power availability is making it difficult to complete some data center deals.

Burgum's calendars reveal numerous meetings and events with technology executives and finance executives, including top executives at Microsoft, Google, Amazon, Meta, Oracle and SpaceX. They also reveal meetings with major financial companies that invest in data centers and power plant infrastructure, including a top infrastructure executive at the private equity firm Blackstone, a global data center investor. Blackstone-backed Tallgrass Energy is building power generation for Google's 2.7 gigawatt data center near Cheyenne, Wyo.

Burgum's calendars are also full of tech conferences and events. Those include the American Dynamism Summit put on by venture capital firm Andreessen Horowitz, and the Powering AI Global Leadership Summit put on by the Hamm Institute for American Energy at Oklahoma State University, which says it "connects industry, innovators, and policymakers to solve practical challenges, from powering AI-scale growth to modernizing infrastructure and permitting."

Burgum appears to have an especially close relationship with his former Microsoft colleagues, including several meetings with Microsoft co-founder Bill Gates and other top Microsoft executives, including a dinner at the Gates residence, and a call with "Satya" — likely Microsoft CEO Satya Nadella. Burgum's calendar also lists the December 2025 annual meeting of Cascade Investment, Gates's private investment firm, including a daylong "investment roundtable with Bill Gates and friends, global industry leaders" at the Four Seasons hotel in New York, with about 70 people expected.

Event: Dinner

Start Date: 2025-05-15 01:00:00 +0000

End Date: 2025-05-15 03:00:00 +0000

Organizer: scheduling_interior <scheduling_interior@ios.doi.gov>

Location: Gates Residence

Burgum's calendar shows a dinner at the "Gates Residence" in May 2025

Event: CALL: Satya

Start Date: 2025-09-03 00:30:00 +0000

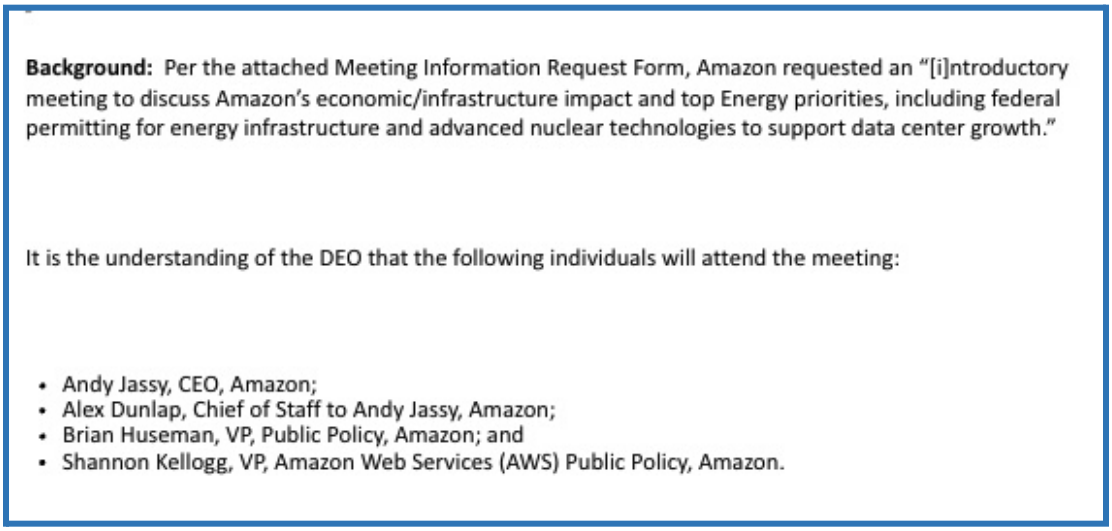

End Date: 2025-09-03 01:00:00 +0000

Organizer: scheduling_interior <scheduling_interior@ios.doi.gov>

A call with "Satya" — most likely the Microsoft CEO Satya Nadella — in September 2025.

Burgum speaks with Erin Price-Wright, general partner with Andreessen Horowitz, at the venture capital firm's American Dynamism summit in 2025.

Background: Per the attached Meeting Information Request Form, Amazon requested an "[i]ntroductory meeting to discuss Amazon's economic/infrastructure impact and top Energy priorities, including federal permitting for energy infrastructure and advanced nuclear technologies to support data center growth."

It is the understanding of the DEO that the following individuals will attend the meeting:

- Andy Jassy, CEO, Amazon;
- Alex Dunlap, Chief of Staff to Andy Jassy, Amazon;
- Brian Huseman, VP, Public Policy, Amazon; and
- Shannon Kellogg, VP, Amazon Web Services (AWS) Public Policy, Amazon.

An excerpt from a calendar entry for a March 5, 2025 meeting between Burgum and Amazon CEO Andy Jassy to discuss "data center growth" and other energy issues.

Confirmed Speakers:

- Bill Gates, Chair, Gates Foundation; Founder, Breakthrough Energy and TerraPower
- Jeffrey Ding, Assistant Professor of Political Science, George Washington University
- Dan Roth, Vice President and Editor in Chief, LinkedIn
- Mohamed El-Erian, Chief Economic Advisor, Allianz
- Patrick Collison, Stripe
- And other notables

A list of confirmed speakers for the annual Microsoft CEO Summit in May 2025, which featured Burgum along with technology industry executives.

Burgum also met with Energy Capital Partners founder Doug Kimmelman, whose private equity firm is a major investor and owner of power plants and other energy infrastructure in the U.S. and overseas, including a $50 billion data center project in Texas as well as a $25 billion data center project in Abu Dhabi. On two occasions Burgum appeared on the "All In" podcast — a favorite of tech elites hosted by venture capitalists David Friedberg, Chamath Palihapitiya and Jason Calacanis, as well as David Sacks, the White House's former AI and crypto czar. Many prominent Silicon Valley figures were listed on Burgum's calendar for a dinner in September 2025.

The scheduled attendees were Sacks, Palihapitiya, Health and Human Services Secretary Robert F. Kennedy Jr., the now-departed Director of National Intelligence Tulsi Gabbard, Treasury Secretary

Scott Bessent, Google co-founder Sergey Brin, Mastercard CEO Michael Miebach and Omeed Malik, the founder of 1789 Capital, the venture capital firm that employs Donald Trump Jr.

Another financial industry titan on Burgum's calendar is Thomas Tull, co-chairman of TWG Global, a financial and sports giant under federal investigation over its business practices. TWG is both a data center investor and investor in Colossal Biosciences, a biotech company with close ties to Burgum that aims to use biotechnology to bring the woolly mammoth out of extinction by the early 2030s. In mid-2026, the U.S. Fish and Wildlife Service announced a partnership with Colossal to "advance the use of biobanking and genomic science in support of wildlife conservation and species recovery efforts." Ben Lamm, founder of Colossal Biosciences, met with Burgum in March 2025. Lamm is teaming up with Anduril founder Palmer Luckey to develop genetically engineered dogs for war, through a new company called Warhound.

Another TWG executive, Amos Hochstein, who appears on Burgum's calendar on two occasions (including a Zoom call), was President Joe Biden's former top energy adviser. Hochstein said in June 2026 that "The biggest political crisis that's coming to this country in the next six months to two years is going to be Americans opposing AI — that translates to opposing data centers and power plants." While Burgum has on numerous occasions been outwardly scornful about Biden-era policies, those negative feelings appear not to extend to Hochstein. In July 2025, Burgum met the founders of Proto-Town, a venture capital backed 1,200-acre "hardware innovation commune" in Texas where startup founders live and work long hours together. The calendar item says the topic was to "Discuss building a new industrial Freedom City."

> **"What's going to save the planet is winning the AI arms race. We need power to do that, and we need it right now ...The real existential threat right now is not a degree of climate change, It's the fact that we could lose the AI arms race if we don't have enough power."** — Interior Secretary Doug Burgum, talking to reporters at a natural gas industry conference in Italy, September 2025

"It's About Manufacturing Intelligence"

Burgum was an early adopter of the idea that the term "artificial intelligence" was in need of a rebrand. In interviews, Burgum has repeatedly described AI data centers as "intelligence factories" or used other awkward metaphors to describe the data center industry. "We may be ahead of [China] on the technology for AI," Burgum said at an economic summit. "They're way ahead of us in terms of building the horsepower to power that, because this is where you convert a kilowatt of electricity into intelligence," Burgum said.

Burgum told *Fox Business* that data centers are "a place where you manufacture intelligence. We have to manufacture intelligence." He told CNBC that "it really isn't about the data. It's about manufacturing intelligence, and … this is part of we have to win the intelligence race. We have to build more intelligence than China does to win the intelligence race, and that means we've got to build more electricity, which means we need more natural gas. Thank goodness, who's the biggest natural gas supplier in the world? The United States. So we are so well positioned to go win this intelligence race."

Trump has mocked opponents of data centers as people who "want to end up being backwards and poor," and Burgum has been dismissive of Americans' concern as well. "No one's electric bill has gone up because of a data center," Burgum claimed on Fox News, waving away concerns about data center growth on power prices for residential and business customers. On *Fox Business*, Burgum called reports that AI power demand is impacting family utility budgets "fake news." However, Burgum has also appeared to mix up his messages. In a May 2026 interview with *Breitbart,* he acknowledged that "When you bring in AI, the rates go up because they use so much power."

Burgum has repeatedly alleged that "foreign source dark money" or "foreign psy ops campaigns" are opposing AI data centers, an assertion that downplays the data center industry's widespread unpopularity. Burgum has also blamed "the climate fantasy policies" for higher electricity prices — a conclusion that runs counter to reports indicating renewable energy is "the most cost-competitive form of new-build generation," according to a cost analysis of different types of power generation published by investment bank Lazard.

Private Data Centers on Public Lands

> **"Sell-offs of public lands to build mega data centers [are] shortsighted. Boiseans and Idahoans know that public lands should stay in public hands."**
>
> — Boise Mayor Lauren McLean, quoted in the Idaho Statesman, September 2026.

Under Burgum, the Bureau of Land Management has aggressively pushed the development of data centers on public lands, even though it remains unclear whether data centers are even a permissible use for public lands. The agency says it will prioritize "oil, gas, and mineral development among other uses such as electric transmission lines, power generation facilities, and data centers to advance artificial intelligence," according to a BLM budget document.

A U.S. Geological Survey analysis done under Burgum found that more than 90 million acres of Bureau of Land Management lands lie within 10 miles of existing high-voltage transmission lines. The BLM asked state-level leaders to identify public lands suitable for data centers and send those lists to the Interior Department, according to a report in the *Washington Sun*.

Public records show that the BLM is considering at least 15 sites on public lands in Arizona, Idaho, Nevada, Oregon, Utah and Wyoming, according to the Center for Western Priorities, which found that one developer, Copia Digital, has made numerous data center proposals in five states, including a 2,520-acre parcel near Las Vegas. Details of these projects, in some cases, remain incomplete. Below is a look at some of these proposals:

NEVADA: In summer 2026, the BLM approved the Townsite Data Center proposal in Boulder City, Nevada, outraging residents of the community near the Hoover Dam. This project was originally conceived as a solar farm and then switched to a data center and approved with little public input. "There's been no chance for the community or for the city to provide any input to the federal government," Lisa LaPlante, a spokesperson for Boulder City told *E&E News*. "This feels so unprecedented for us to have a project placed in our city without the chance to weigh in." In the ensuing weeks, the Nevada project has run into legal trouble. An internal appeals body at the Interior Department in early September halted construction to review appeals by Boulder City and environmental groups. In October, the appeals body ruled the project would need a new

environmental review before the project can proceed. The BLM had contended that no such review was necessary, arguing that the data center would have similar impacts as a solar farm, though the BLM itself asked the board in September to dismiss its approval "to allow the agency to conduct additional review," according to the Nevada Current.

Also in Nevada, a developer has pulled out of a data center project paired with a natural gas power plant in Henderson, Nevada on BLM land due to the planned urban developments in that same area. Another developer, Clearway Energy, whose CEO met with Burgum in September 2025, initially proposed to convert a 500-megawatt solar farm proposal east of Reno into a data center and gas-fired power plant, then canceled that plan and reverted back to the original proposal for a solar farm after reporting by *Heatmap News* exposed the conversion proposal.

IDAHO: A subsidiary of Nevada-based Arevia Power, a company pivoting from solar to data centers with gas-fired power plants, is proposing a data center and gas-fired power plant on Bureau of Land Management property south of Boise. The project would be five times as large as a nearby Meta data center and the first in Idaho to operate on public lands. Boise Mayor Lauren McLean strongly criticized the proposal, the *Idaho Statesman* reported. "America's public lands have created a legacy unlike any in the world," McLean said in a statement, "They are held in trust for each of us, for our kids and their kids. Nearly every Boisean will tell you that easy access to open space is one of the most special things about living here. Sell offs of public lands to build mega data centers is shortsighted. Boiseans and Idahoans know that public lands should stay in public hands."

UTAH: Valar Atomics, a nuclear startup backed by Silicon Valley investors, is planning to place 456 small nuclear reactors on more than 9,000 acres of Bureau of Land Management land in Utah, *KUER News* reported. The proposed project, dubbed "Project Beehive," would use an experimental helium-cooled micro-reactor, dubbed Ward 250, that has not yet been approved by the Nuclear Regulatory Commission. The project reactor demonstrated a fission reaction in summer 2026. In addition to the reactors, the site would include data centers, a facility to make nuclear fuel and nuclear waste storage. The project would, at least in theory, generate up to around 9.6 gigawatts of power, more than double Utah's current average electricity output. "If we have facilities like this on public land for waste storage, for massive nuclear development, for data centers, that's going to have tremendous implications for how public lands are used," Lexi Tuddenham, executive director of the Healthy Environment Alliance of Utah, *told KUER News*.

VIRGINIA: In Northern Virginia, federal officials are considering a land swap that would allow data center developer Highland Digital to build at least four data centers inside the boundary of a national

park. The developer behind the proposed deal hired an adviser to the Interior Department under the first Trump administration who was also chief of staff to Rep. Lauren Boebert (R-Colo.).

OREGON: A California-based company, Copia Digital has applied to build a data center in eastern Oregon on 106 acres of Bureau of Land Management land, according to the *Oregon Capital Chronicle.*

Table 4: Top Technology/Finance Executives on Burgum's 2025 Calendar

Date	Executive	Title & Company	Sector
2/5/2025	Alexandr Wang (likely)	Formerly CEO, Scale AI now chief AI officer, Meta	Technology
2/12/2025	Safra Catz	CEO, Oracle	Technology
3/4/2025	Daniel Yergin	Vice Chairman, S&P Global	Finance
3/5/2025	Andy Jassy	CEO, Amazon	Technology
3/11/2025	Parker Meeks	CEO, Utility Global	Technology
3/13/2025	Sean Klimczak	Global Head of Infrastructure, Blackstone	Finance
3/17/2025	Thomas Tull	Co-chairman, TWG Global	Finance
3/17/2025	Doug Kimmelman	Founder, Energy Capital Partners	Finance
4/17/2025	David Fialkow	Co-founder, General Catalyst	Technology
4/29/2025	Chris Liddell	Former CFO, Microsoft and GM; former White House Deputy Chief of Staff. Anthropic board member	Technology
4/30/2025	Ruth Porat	President & CIO, Alphabet/Google	Technology
5/15/2025	Brad Smith	Vice Chair & President, Microsoft	Technology
5/15/2025	Bill Gates	Co-Founder, Microsoft	Technology

At Home Among The International Jet Set

A member of a private ski resort and golf club outside Big Sky, Montana, Burgum appears at ease with the international corporate set. Burgum's 2025 calendar lists 19 entries for officials from six foreign governments. That includes seven from the United Arab Emirates, four with Canadian provincial leaders, three from Greece, two from Italy, two from India and one from Australia. At times, Burgum's world of high-profile foreign leaders, businesspeople and government officials has come together. Burgum's calendar for June 16, 2025 shows a 6:00 p.m. dinner with United Arab Emirates Ambassador Yousef Al Otaiba in the upstairs wine room at Cafe Milano in Georgetown.

The dinner apparently brought together an influential set of energy, technology, media and foreign policy luminaries, including UAE Minister Sultan Al Jaber as well as Occidental Petroleum CEO Vicki Hollub, former Biden administration energy official Amos Hochstein and Trump administration technology policy officials David Sacks and Michael Kratsios. Also on the invite list were Bernard Looney, former BP CEO and current chief executive of data center developer Prometheus Hyperscale; television anchors Bret Baier and Norah O'Donnell; and Fred Kempe, president of the Atlantic Council, a foreign policy think tank. Months later, on Nov. 2, 2025, the U.S. and United Arab Emirates signed a memorandum of understanding to expand cooperation on artificial intelligence and energy.

HE Yousef Al Otaiba
HE Dr. Sultan Al Jaber
His Excellency Luis Moreno
Mr. Jeff Zucker
Mr. Richard Goldberg
Mr. Hunter Hunt
Ms. Vicki Hollub
The Honorable Stuart Jones
The Honorable Chris Wright
Mrs. Liz Wright

Ms. Lyndsey Merrill
Mr. Bret Baier
Mrs. Norah O'Donnell
Mr. David Sacks
Mr. Amos Hochstein
Mr. Fred Kempe
The Honorable David McCormick
Mr. Geoff Morrell
Mr. Bernard Looney
His Excellency Mohamed Al Ramahi
Mr. Roger Kearns
Mr. Michael Kratsios
Mr. Raul Fernandez
His Excellency Majid Al Suwaidi
Mr. Ken Dillon
Mr. Girish Rishi
Ms. Marjorie Adams

Invite List for June 16, 2025 dinner at Cafe Milano in Georgetown with foreign officials, business executives and media figures

Burgum's agenda has included extensive foreign travel as leader of President Trump's newly created National Energy Dominance Council, including trips to Athens, Abu Dhabi, Tokyo and Caracas — all in his first 18 months in office. After the Venezuela trip, Burgum boasted with little explanation of bringing back $100 million in gold to the U.S. and touted the opportunities for U.S. mining companies to operate there — prompting a skeptical reaction. "What does bringing back a case of gold from Venezuela have to do with the [agency's] mission?" inquired Rep. Chellie Pingree (D-Maine) at a House hearing. The *New York Times* later reported that the Trump administration negotiated a deal with Venezuela's state-owned oil producer to give the international commodities giant Trafigura rights to buy and export gold from Venezuela's mines — a sector that has long been plagued with criminality.

Burgum posted on X.com about meeting the Crown Prince of Bahrain in November 2025

Doug Burgum met with Greece's Minister for the Environment and Energy Stavros Papastavrou

War on Renewable Energy, Government Handouts for Fossil Fuels

Burgum has sought to curtail the renewables industry, claiming that Chinese-made solar panels are "an issue for national security" and asserting the unsubstantiated argument that large-scale offshore wind turbine projects present a national security risk, arguing that offshore wind farms could hamper the ability to detect an undersea drone attack on the U.S. In July 2025, the Interior Department established a new policy saying Burgum would need to personally review all actions related to wind and solar energy, including minor procedural steps that would not typically rise to such a senior level, giving Burgum the power to bog down projects.

In March 2026, the Trump administration announced what it called a "landmark agreement" to refund $928 million in lease payments to energy giant TotalEnergies to cancel its planned wind farm projects off the coasts of New York and North Carolina. Months earlier, the CEO of TotalEnergies, Patrick Pouyanné, had a "very quick pull aside" meeting with Burgum in September 2025, according to Burgum's calendar. Under the deal, TotalEnergies agreed to invest in a liquefied natural gas export terminal in Texas, as well as offshore and onshore oil and gas drilling projects. Since then, as of late 2026, Interior has reached similar offshore wind lease buyout agreements worth about $4 billion with several other wind power developers, spurring lawsuits from Democratic attorneys general in multiple states. One of the deals in particular has attracted scrutiny after the *Washington Post* reported that it benefited a Trump donor's company.

Miners Get Access and Benefits

The Trump administration has been relentless in its push to open up mining on public lands, short-circuiting environmental reviews, shutting out the public, rushing through permits and making it far easier for corporate interests to own America's most treasured places, including many sacred to Indigenous tribal nations. The Trump administration has used taxpayer money to buy ownership stakes in mining projects that the federal government also regulates, setting up a fundamental conflict of interest, providing an incentive for the government to push mining without proper environmental, ethical and community input standards.

A White House executive order from March 2025 set the stage for this mining push, specifying that in federal lands with mineral deposits and reserves, the Interior Secretary must prioritize mining as "the primary land uses in these areas" — indicating that the Trump administration plans to tilt the scale against other public lands uses, such as outdoor recreation. The order also waived limits on Defense

Department financing for mineral production and pledged to expand public investment in domestic and foreign mining through several federal agencies, and waived rules requiring mining companies to provide detailed evidence showing that their investments are economically feasible. The Trump administration has since made direct investments in numerous mining companies, including Trilogy Metals, Lithium Americas and MP Materials, while touting the long-struggling coal industry as well, and even trying to promote it with a cartoon character dubbed "Coalie."

A cartoon of Burgum and "Coalie" posted on X.com

The coal industry has benefited from several Trump administration actions, including ending a federal moratorium on new coal leasing, creating a new tax credit for metallurgical coal used to make steel added to the 2025 Republican tax bill, the addition of metallurgical coal to the Interior Department's final critical minerals list and $625 million in federal funding to modernize and recommission aging, uneconomic coal fired power plants. An analysis by the Environmental Defense Fund found that the Trump administration committed $950 million to 24 coal plants and provided exemptions from toxic air pollution limits to 70 coal plants.

One coal industry executive on Burgum's calendar is Jay Justice, son of Sen. Jim Justice (R-W.Va.). The two held a call in April 2025 and met in June 2025. Jay Justice is president and CEO of Bluestone Resources Inc., his family's troubled coal business, which has long faced allegations of workplace safety and environmental violations as well as unpaid fines. ProPublica and Mountain State Spotlight reported in June 2026 that the Trump administration ended a federal criminal investigation of the Justice coal companies, including potential Clean Water Act violations in Jay Justice's business.

Burgum met with uranium and rare earths mining company Energy Fuels in March 2025 at the start of his term. The company has a uranium mill in Utah just outside the boundary of Bears Ears and an active uranium mine near the Grand Canyon in Arizona. That mine sends uranium to Utah for its processing. In summer 2026, the Trump administration dramatically shrunk the boundaries of Bears Ears and Grand Staircase-Escalante national monuments in Utah by nearly 3 million acres. This action was a larger reduction than in 2017 when Interior Secretary Ryan Zinke slashed the boundaries of the monuments by about 2 million acres. Since the Bears Ears monument boundaries were shrunk in July 2026 mining companies have staked 72 claims to mine in the area as of Sept. 2026.

In Alaska, Burgum issued permits for a more than 200-mile road across pristine wilderness over the objections of Native tribes, hunters, anglers and conservation groups. Mining companies have long sought the road, known as the Ambler Access Project, to reach deposits of copper, zinc, lead and other minerals. The controversial proposed road, denied by the Biden administration, would cross 26 miles of Gates of the Arctic National Park and Preserve, harming wildlife migration and Indigenous communities that rely on caribou for subsistence hunting. To advance the project, the Pentagon made a nearly $36 million equity investment in a Canadian mining firm, Trilogy Metals, which is developing the project in a joint venture with Australian mining firm South32 Limited.

Other mining executives on Burgum's calendar **(Table 7)** included Mike Henry, then the CEO of BHP Group, executives from U.S. Strategic Metals, Freeport McMoran, Rio Tinto and MP Materials, a Las Vegas-based critical minerals firm that has received a $400 million investment from the Pentagon. Mining investor Oskar Lewnowski, who has called for governments to make direct investments in mining so as to avert a crisis in metals supply, met with Burgum in March 2025. Months later, the U.S. International Development Finance Corp. announced a $1.8 billion partnership with Orion to invest in critical minerals projects around the world. Orion also has a $250 million investment in the controversial Thacker Pass lithium mine, which is located on Bureau of Land Management land in Nevada. That site attracted attention in January 2026 when the *New York Times* reported that Karen Budd-Falen, a top Interior Department official, failed to disclose that her husband sold water rights to the mine's developer for $3.5 million in 2018 — a deal that depended on the mine receiving a permit from Interior.

Table 7: Mining and Coal Executives on Burgum's 2025 Calendar

Date	Executive	Title & Company
2/26/2025	Mike Henry	CEO, BHP Group (at time of meeting)
3/3/2025	Unknown	U.S. Strategic Metals
3/4/2025	Sandy Fabritz	Director of Water Strategy at Freeport McMoRan Copper & Gold
3/11/2025	Unknown (scheduled)	Rio Tinto
3/13/2025	Unknown	Energy Fuels
3/14/2025	Oskar Lewnowski	Founder & Group CEO, Orion Resource Partners
3/21/2025	Rich Nolan	President & CEO, National Mining Association
4/7/2025, 6/30/2025	Jay Justice	President & CEO, Bluestone Resources
10/29/2025	James Litinsky	CEO, MP Materials

Conclusion

Doug Burgum appears most at home boosting the agenda of the nation's CEOs while dining with foreign leaders and business titans and dutifully implementing Trump's directives. During the first Trump administration, Interior Secretaries David Bernhardt and Ryan Zinke also ran the agency to help powerful corporate interests such as drilling and mining companies. However, Burgum has taken corporate fealty to a new extreme. While Burgum views the iconic conservation president Theodore Roosevelt as a personal hero, Burgum's legacy more closely resembles that of President Ronald Reagan's first Interior Secretary, James Watt, who was infamous for his opposition to conservation and favoritism to corporations. Burgum would do better to heed the words of Roosevelt, who famously warned against the over-exploitation of America's public lands. "Here is your country," he said. "Cherish these natural wonders, cherish the natural resources, cherish the history and romance as a sacred heritage, for your children and your children's children. Do not let selfish men or greedy interests skin your country of its beauty, its riches or its romance."
