We Add Value and Drive Success

Boundless and energetic, our entrepreneurial focus provides a unique vision in real estate management and investment.

The Portopiccino Group is a family owned private equity and investment management firm. Maintaining an ever-growing portfolio of properties leased to skilled nursing operators, our company has expanded its growing vision to include companies specializing in health care related services, as well as non-health care related real estate and business investment opportunities. Our commitment to bring value to each asset permeates through every level of our company. Integral to The Portopiccino Group's success is our keen understanding of the key financial performance variables necessary to realize the potential of every investment. This skill drives us to act swiftly and decisively on all business and real estate acquisitions and divestments.

Today, our people strive to create value by acquiring distressed assets and other value-add projects and swiftly turning them profitable by employing an active approach to ownership and value creation. We develop excellent management teams who work tirelessly to deploy worth-building strategies. We believe that our attention to every detail of our company, and the shared values we've espoused since our founding are key to maintaining a competitive advantage.

Using this strategy, The Portopiccino Group maintains complete continuity of its investment strategy and core focus, but always with an eye on evolving for the future.
