Good morning,

I assume you are aware of the attached letter to President Trump from the Governors of Maryland, Delaware and Virginia. We tend to view this as potentially positive.

As you may also know, Governor Carney has apparently decided not to order the shutdown of all poultry plants in Delaware but will instead implement a rigorous schedule of COVID-19 Antibody testing. This is my understanding from Sec. of AG Scuse.

Dear Ms. Porter,

In follow-up to our initial conversation yesterday with multi-agency partners, I am hoping to have a more focused call with you and the poultry companies to discuss testing strategy and how to best coordinate with you.

I know that this may be short notice, but would it be possible to have a call at 1 or 1:30pm?

Please let me know what would work for you. You can also give me a call at [\(b\) \(6\)](tel:(b) (6))

Thank you,

Jinlene

Subject: Industry feedback

Hi Mindy

Thank you for your work helping us maintain our nation's food supply. The Executive Order invoking the Defense Production Act was a step in the right direction. So was the joint CDC/OSHA guidance to protect employee health. But, more work must be done. By itself, the EO will not stem the closure of plants. Only arming employees with adequate PPE, making testing available, and clarifying guidance (more below) will accomplish what we all want---- to maintain our country's food supply, prevent the collapse of the Ag sector all while safeguarding employee health.

To that end, I think we desperately need CDC/OSHA guidance 2.0. The initial guidance is ambiguous in many places and leaves room for doubt and misinterpretation.

The paragraph below is from a major industry participant. I've excerpted it from an industry email chain. In my opinion, every industry participants share the concerns raised, particularly as it relates to social distancing. I don't need to tell you the challenges the industry has in that regard. I don't think it serves anyone to have ambiguous guidance or to pretend that perfect social distancing is attainable. Modifiers like "to the extent possible" are not helpful to industry participants when second guessing, particularly from quarters that don't have any knowledge or expertise, has become a national pastime. Pandemics, it seems, bring out the worst in the finger pointing class. I wish

there was more presumption of good faith, particularly for those trying to serve their country by maintaining our food supply.

Anyway, I include it here because it underscores how badly needed CDC/OSHA 2.0 is needed.

"I'm not sure if you are hearing from many others after the CDC guidance call yesterday but would be shocked if not. That call was a little terrifying and makes me feel like we were a little duped. We supposedly have the right to operate based on the EO as long as we follow CDC guidance for meat packing plants. The whole idea that we still have to follow social distancing throughout the plant, in spite of having all recommended PPE, doesn't just defy logic but is not realistic. They referred to "engineering" solutions which really means building brick and mortar and putting an entirely new face on the industry that will take years, and the economic incentive, to implement. Short of that, our only alternative is that we essentially reduce throughput and people by 50%. Still leads to meat shortages and euthanizing animals on the farm. I hate to be critical of anyone or any entity during this time frame where we are all dealing with the unknown without a playbook, I was frustrated with the questions that were presented to the CDC on the call. It seemed like we just lobbed them softballs and had VERY little time to ask the tougher questions, or sorted through those submitted and chose not to. It would seem essential that we regroup and try to determine the next steps to challenge these CDC guidelines, which we all know will become best practices then regulation. We have to get the message back to the WH that this is not going to restore the meat supply in any meaningful timeframe and from my opinion, greatly increased our liability as companies since we cannot effectively meet the guidelines that are currently being put forth."

I'm happy to discuss this with you in further detail. (b) (4)

Thank you, Ken cell# (b) (6)

Subject: RE: Industry feedback

Governor Noem is making intentionally misleading statements that completely mischaracterize our willingness to respond to their joint South Dakota Dept of Health/CDC April 23rd report. As you know, we prepared a response and are perfect happy to deliver it. We are caught squarely in the middle of a tug of war, in which we have no interest in being a participant. WE NEED HELP!

Governor Noem “disappointed” Smithfield Foods didn’t share plan on implementing recommendations

by: Travis Fossing, KELO (IA)
May 4, 2020

SIOUX FALLS, S.D. (KELO) — Smithfield Foods in Sioux Falls is one day closer to being back online, but is no longer working directly with the state of South Dakota.

Governor Kristi Noem says she talked with Smithfield Foods on Saturday, but the Executive Order signed by President Donald Trump last week says the plant no longer answers to the state.

“USDA, CDC, and OEHS will be conducting any future reviews of Smithfield’s practices. Because of this we know we won’t expect a response to the letter we sent to Smithfield on April 23rd,” Governor Kristi Noem said.

Noem says the CDC did a walkthrough of the plant Monday morning.

“I’m disappointed we never received Smithfield management’s plan on how they’re going to implement CDC’s recommendations for a safe reopening, but despite that, we’ll continue to do all that we can to protect the health of the Smithfield workforce,” Noem said.

Noem’s team worked with Smithfield in recent weeks to identify needs, acquiring 4,000 face shields and 20,000 face masks through FEMA.

Noem is also keeping an eye on the state revenue...

Dr. Brashears,

Thanks for sharing this information, it is very helpful.

If at all possible, would you be available later this afternoon for us to provide you a brief update on (b) (4) ?

We would certainly accommodate your schedule!

Randy

Randy,

It was great to speak to you today.

I have attached a document put together by the North American Meat Institute on testing. It describes the various types of tests and some context on interpretation.

Please do not hesitate to reach out if you need anything.

Have a great and SAFE day!

Mindy

Mindy M. Brashears, Ph.D.

Subject: COVID-19 Testing

Dr. Brashears,

Thank you so much for taking the time to speak with me today about COVID-19 testing. (b) (4)

We also look forward to being in touch as questions arise around this subject.

Thank you!

Regards,

Randy Day

Mindy,

I just read through the recently released (I think it was today) **CDC Guidance for Meat and Poultry Processing Workers and Employees**.

The key issue is found on page 1, paragraph 1:

“critical infrastructure workers may be permitted to continue work following potential exposure to COVID-19, provided they remain asymptomatic and additional precautions are implemented to protect them and the community”

Delaware is overriding the CDC on this key point and requiring two types of tests (both antibody and virus-PCR) for every employee.

The ideal resolution would be required implementation of this CDC guidance nationwide.

Is there a path forward, in your mind, to make that happen?

Thanks!

Randy

Subject: RE: Poultry Plant Documents

I got another call from Sec Bartenfelder. He tells me Maryland is planning on setting up various testing sites:

- Perdue Stadium in Salisbury
- The Perdue plant in Salisbury
- The Amick plant in Hurlock
- Somewhere in Caroline County (no poultry plants there but there has been a spike in positives there)

I have received nothing in writing. Delmarva Poultry Industry is having a call at 1:30 PM to discuss.

We will have people on the call. I am currently on a call preparing for the implementation of the Delaware Plan.

Wonderful, thanks again for all of your help.

Apparently, Maryland will be next. Just got a call from Sec Bartenfelder that Maryland is setting up a testing site at Perdue Stadium (how ironic!) to test all of "the poultry workers". He did offer a call with himself, Gov Hogan, Sec Shultz and myself on Monday. I will let you know how that goes.

Best,

Randy

Randy,

Thanks for sharing this. I'm glad they have a path forward that will allow you to operate. If the availability of test kits becomes an issue, please let me know. We can help with that.

Mindy.
