

# Too bad Ford Motor Company's motto of 'GO FURTHER,' doesn't apply to our nation's gas tanks.

**Today, Ford Motor Company celebrates 115 years in business by encouraging Trump to roll back the clean car standards.**

With gas prices higher than they've been in four years, the last thing automakers should be doing is rolling back standards that save consumers money at the gas pump. To protect consumers and keep our air clean and climate safe, we need to put clean car standards in the fast lane. But this year, Ford met with President Donald Trump

and U.S. Environmental Protection Agency Administrator Scott Pruitt to roll them back. Tell Ford to celebrate its 115th birthday by putting the clean car standards, also known as the fuel economy standards, back in the fast lane at [forwardnotbackward.org](http://forwardnotbackward.org).
