Lobbying Activity	<ul style="list-style-type: none"> ▪ No limit, but organized primarily as an electioneering PAC. 	<ul style="list-style-type: none"> ▪ No limit, but electioneering is the organization’s primary purpose. 	<ul style="list-style-type: none"> ▪ No limit. 	<ul style="list-style-type: none"> ▪ “No substantial part” of its activities may be for either “direct” lobbying (influence legislative bodies) or “grass-roots” lobbying (influence public opinion to affect legislation). ▪ “No substantial part” has never been clearly defined, but the expenditures test is that lobbying activity should not exceed 5% of the charity’s revenues if the charity has not elected 501(h) status, or 20% of direct lobbying activity and 25% of indirect lobbying activity if the charity elected 501(h) status, up to a maximum of \$1 million. ▪ Lobbying activity does not include communications of non-partisan analyses, research or reports.

¹ The primary purpose standard for a 501(c) can be very broadly stated in the organization’s registration documents and tax filings. In assessing whether an organization’s electioneering activities have exceeded permissible boundaries, the IRS would apply a facts-and-circumstances test. For example, if a 501(c)(5) labor union ran extensive political ads promoting candidates explicitly because they are affiliated with the Democratic party, the facts-and-circumstances in this case could warrant a decision that party affiliation is not a primary purpose of the labor union and thus the ads risk the union’s tax status.

² Despite ambiguity, the facts-and-circumstances test for tax exemption status can be distinguished from the elected expenditure test [501(h) status] in two respects. First, the latter is based exclusively on expenditures of money, whereas the former looks at expenditures as well as other factors such as time and effort expended, including the time and effort of unpaid volunteers, and the relative place of the organization’s lobbying activities in its larger agenda. Second, the elected expenditure test limits grass-roots lobbying to one-fourth of permissible lobbying, whereas the facts-and-circumstances test makes no distinction between direct and grass-roots lobbying.
