Public Citizen, founded in 1971, is a non-profit research, lobbying and litigation organization based in Washington, D.C. Public Citizen advocates for consumer protection and for government and corporate accountability, and is supported by over 160,000 members throughout the United States.

Introduction

A worldwide crisis over water is brewing. According to the United Nations, 31 countries are now facing water scarcity and 1 billion people lack access clean drinking water. The World Bank predicts that by 2025, two-thirds of the world's population will suffer from lack of clean and safe drinking water. Today, people around the world are losing ownership and control of the water which remains.

Fortune magazine has predicted that "water is the oil of the 21 century," and corporations are rushing to invest in the new get-rich economy of water. Consumption of water is predicted to double every 20 years; at the same time, water sources are rapidly being polluted, depleted, diverted. This situation is being exploited by corporate interests ranging from industrial agriculture and manufacturing to electricity production and mining. Water scarcity and pollution problems are not just endemic in the developing world. Here in the United States, multinational energy, food, soft drink, and shipping companies have plans to buy water rights, privatize publicly-owned water systems, promote bottled water, and sell "bulk" water by transporting it from water rich areas to thirsty markets. Meanwhile, to ensure maximum profits, corporations are lobbying to weaken water quality standards, and pushing for trade agreements that hand over U.S. water resources to foreign corporations.

Instead of protecting water resources from self-interested profiteers, our government is retreating from its responsibility and bending to the will of giant transnational corporations that are poised to profit from the water industry. In response to this situation, a growing movement is coalescing around water issues. While some

organizations are national in scope, working on federal water legislation, many of the groups working on water are local grassroots organizations addressing a particular crisis in their community ranging from protecting local waterways to fighting the privatization of their local municipal utility.

Public Citizen's Water for All Campaign is dedicated to protecting water as part of the global commons, stopping water privatization and bulk water sales, reforming policies of the International Finance Institutions, and defending access to clean and affordable water around the world. Here in the United States we have had the pleasure to work with many different organizations working on water issues, and have found that many groups work very locally and in some cases have not had the benefit of networking with other organizations doing similar work. We began collecting names with the idea of helping to strengthen the water movement by facilitating communication between organizations.

This directory lists more than 700 contacts for groups around the country. If your group works on water and is not listed, or you know of other organizations left out, please contact us at cmep@citizen.org and put "Add to water directory" in the subject line. We hope that the water directory is a useful resource guide for you, as we work together to build a strong movement to protect and defend water for future generations.

Mission Statement:

The Campaign for Safe and Affordable Drinking Water (CSADW) is a nationwide alliance of environmental, consumer and public health organizations working to educate the public about improvement and protection of our nation's drinking water sources.

The Campaign was founded in 1994 on Principles for Safe and Affordable Drinking Water which were endorsed by over 300 organizations from across the country.

Campaign to Safeguard America's Waters (C-SAW)

Box 956
Haines
AK 99827
Tel: 907.766.3005
Fax: 907.766.3005

Mission Statement:

C-SAW is a national project of the Earth Island Institute, dedicated to closing loopholes in federal and state water pollution regulations that allow millions of gallons of polluted wastes to be dumped into public waters every day. Many of these polluted wastestreams are "legally permitted" through the application of discretionary "implementation policies": rules that allow regulators to modify or circumvent the normal restrictions (Water Quality Standards) on waste dumping intended to protect public health and the aquatic environment. Examples of these administrative loopholes, e.g., mixing zones, zones of deposit, and site-specific criteria, will be discussed on this site along with articles, letters, and advice on how to ensure the Clean Water Act is properly administered in the waters where you live. Clean water is a right, not a privilege. Let's work together to ensure that our waters are safe and productive. We all need clean water!

Clean Water Action

4455 Connecticut Ave. NW Suite
A300
Washington
DC 20008

Tel: 510.208.4555
Fax: 510.208.4562
envlaw@envirolaw.org
www.envirolaw.org

Mission Statement:

The environment is the place where we live, work and play. Given accurate and complete information, and the opportunity to make a choice, people will choose products or actions which improve or do not degrade the environment. However, not everyone in our society has a choice about the quality of his or her environment. Those who most need the Environmental Law Foundation's resources are those who lack choice and lack access to the political and economic power that ensures choice. ELF's purpose is to improve environmental quality for those most at risk by providing access to information, strategies, and enforcement of environmental, toxics, and community right-to-know laws.

Environmental Working Group

Washington
DC 20001
Tel: 202.462.1177
info@wdc.greenpeace.org
www.greenpeaceusa.org

Mission Statement:

For over 30 years, Greenpeace has tackled the most critical environmental issues. While we are best known for hanging banners and chasing whalers, much of our work is done behind the scenes in areas such as research and consultation. Our expertise has earned us attendance at major international environmental policy and treaty meetings and we maintain consultative status to the United Nations. Our effective work for new laws and policies, has precluded contributions to Greenpeace from being tax-deductible. Our work focuses on six major efforts: saving ancient forests, stopping global warming, exposing toxic pollutants, protecting the oceans, eliminating the threat of genetic engineering, and ending the nuclear age. There are more than 40 Greenpeace offices around the world, with international coordination taking place through our headquarters in Amsterdam - making Greenpeace one of the few environmental groups that truly works globally on environmental problems.

Mission Statement:

Whether it's the creek that meanders through town, the lake where we fish and swim, the majestic ocean beaches that inspire our awe of nature, or simply the glass of water we drink, clean water is essential to our well-being. NRDC fights to safeguard drinking water, to protect, preserve and restore our rivers, streams, lakes, wetlands and coastal waters, and to promote conservation and better water management in the arid western states.

Ocean Conservancy

1725 DeSales Street NW Suite 600
Washington
DC 20036
Tel: 800.519.1541
info@oceanconservancy.org
www.oceanconservancy.org

Mission Statement:

We envision a world of healthy, protected oceans with wild and flourishing ecosystems, free of pollution, and filled with diverse and abundant marine wildlife. For centuries people have exploited the oceans with little thought to the future. Clearly, we can't afford to neglect them any longer. They provide much of the food we eat and the oxygen we breathe, and they are home to 97 percent of all living matter. Our very existence depends upon healthy oceans. We at The Ocean Conservancy know that it is not too late. By changing the way people think about the oceans—valuing them for their beauty and diversity as well as their utility—we can turn the tide of failing ocean health. By inspiring people to speak and act for the oceans, The Ocean Conservancy is working to conserve and restore wild, healthy oceans.

WatershedWeb

Woodinville
WA 98077
sasquatch@watershedweb.net

Mission Statement:

The project's goal is to promote watershed awareness and restoration as well as to build general community on a variety of geographic scales. We hope to achieve this goal by providing "turn key" web-based interfaces that leverage the content creation, networking, organizing, and collaboration features of the powerful CivicSpace package combined with "social" networking features ala Friendster or LinkedIn, but utilizing shared watersheds as the group organizing theme. Add to these features the crucial integration of online technical resources such as watershed and land use mapping services data often freely available from various governmental, educational and public interest sources.

Working for America Institute

815 16th Street, NW
Washington
DC 20006
Tel: 202.974.8100

Washington
DC 20002
Tel: 202.729.7600
Fax: 202.729.7610
<http://water.wri.org/index.cfm>

Mission Statement:

All life on this planet depends on water, a precious resource. Yet, we are struggling to manage water in ways that are efficient, equitable, and environmentally sound. Many parts of the world will face increasingly dire conditions as populations grow, cities expand, and sources of clean, fresh water disappear.

To avert damaging social and environmental outcomes, we need bold policy reforms. Perverse policies are the main cause of the waste and inefficiency that drive freshwater pollution and over-consumption.

Reforming these policies requires governments to implement far-reaching institutional change and promote technical innovation.

Mission Statement:

Environment Now's mission is to be an active leader in creating measurably effective environmental programs to protect and restore California's environment. Since inception, our focus has been on critical issues near to the hearts of Californians and our founders: preservation of coasts and forests, and reduction of air pollution and urban sprawl. Our ultimate goal is to restore the balance and health of California's ecosystems. We believe that this goal is achievable through an intelligent combination of enforcement of existing laws, and application of technology and process improvements to eliminate unsustainable practices.

Mission Statement:

Our campaigns protect the basis for life: food, water and democracy. We fight for safe and sustainable agriculture that provides locally-grown and nutritious food produced in a humane fashion. We advocate for democratic control and protection of public water resources in the face of international corporate strategies to privatize their ownership and distribution.

San Jose
CA95124
Tel: 408.371.0331
Fax: 408.371.9459
www.unitedanglers.org

Mission Statement:

United Anglers was founded in 1981 to stop the decline of our fisheries by ensuring resources are properly managed. Our goal is to unite anglers, fishing groups, businesses, and citizens into a powerful statewide fishery conservation organization. Joining forces means our voice is loud enough to be heard by those who make the decisions that affect our fisheries. Most of our fisheries have declined by 80% to 99%. The department of fish and game does NOT have the power to protect our state's fisheries. This is the major cause of our fishery declines! We are working with the government to pass laws that mandate the proper protection of the public's fisheries. We feel that the public needs to help pay for managing their resources. Otherwise license fees will continue to increase. Millions of dollars of fishing license revenues having been spent on non-fishing-related activities.

Mission Statement:

The Urban Environmental WALL (Water, Air, Land, and Legislation) program introduces youth to a spectrum of environmental issues affecting the quality of health and life in their urban community. Youth are challenged and encouraged to explore how water and air quality are affected by land use and legislation. Program activities include: Career Training Experience, Mentor Program, Leadership Skills Training, Boat Building Project, Potomac River Program and Water Festival. The theme for this First Annual Urban Water Festival was "Educating Our Youth to Save Our Environment." All of the activities focused on the important role our youth play in protecting natural resources.

Mission Statement:

The Tulane Environmental Law Clinic's mission is to train effective and ethical lawyers by guiding law students through actual client representation. The Clinic represents those who could not otherwise afford competent legal help. By giving a voice to clients who would otherwise not be heard, the Clinic broadens public participation in environmental decisions - before both courts and administrative agencies. By representing clients who have historically been left out of governmental processes, the Clinic has become a powerful force for reforming environmental law in Louisiana.

Minnesota Water Alliance

2105 First Avenue South
Minneapolis
MN 55404
www.mnwater.org

Mission Statement:

Minnesota Water Alliance is a citizen's network that advocates for strong public participation in water resource management. We are concerned primarily with water infrastructure privatization. We believe that, in the effort to create a water sustainable future for people and ecosystems, stewardship of water as a common good can best be achieved through collaboration across all institutions concerned with water management. Therefore, we believe that the state of Minnesota will best be served by the development of a holistic and integrated water management system that reflects the strengths and limitations of each watershed and the needs of the community.

Mission Statement:

The purpose of the Network is to provide a network of rural and urban Nevadans to advocate for and protect sustainable water use and conservation that

- a. Promotes equity in the use of water in both urban and rural areas through research, planning, grass roots development, dissemination of new information, public education about water, and litigation.
- b. Protects the public's interest in Nevada's water and water quality
- c. Encourages development and maintains quality of life without jeopardizing people and natural resources dependent on water
- d. Sustains the economies of rural counties and Native American tribes dependent on water
- e. Develops dialogue about privatizing Nevada's water for profit
- f. Supports plant and animal species survival in the natural environment.

SMART - Sensible Management of Aquatic Resources Team

Austin
TX
Tel: 713.648.6152
sparky@smart-usa.org

Mission Statement:

In Texas, we are proud to have formed a massive coalition of over 300,000 members to assist in creating a healthier system of aquatic vegetation management. Our organization is called Sensible Management of Aquatic Resources Team (SMART). SMART consists of all major bass fishing organizations, conservation and environmental groups in Texas. This coalition was formed because of a strong common belief that herbicides used in fresh water drinking systems and the destruction of aquatic habitat through the use of these chemicals is destroying our natural heritage and the health of our citizens. SMART members are working with legislators to provide Texas with new laws that will assist in creating management plans that offer cleaner water and a better future for all of our state's inhabitants.

Water Stewards Network

23 Bartlett Bay Rd
South Burlington
VT 05403
Tel: 802.660.8094
info@waterstewards.org
www.waterstewards.org

Mission Statement:

The Water Stewards Network (WSN) is an organization founded and run by young water activists who are concerned about the corporate theft of the water commons and about the ways in which we, as a society, are currently mismanaging our freshwater consumption. WSN's principal role in this movement has been introducing a pro-active focus on community- and ecology-based water management. We see the corporate interest in water as a direct result of society's inability to properly manage our freshwater resources and believe it will only be overcome when we take local initiative to improve our water stewardship.

Madison
WI 53719-2809
Tel: 608.662.0923
Fax: 608.833.7179
www.wisconsinlakes.org

Mission Statement:

The Wisconsin Association of Lakes is a nonprofit group of citizens, organizations, and businesses working for clean, safe, healthy lakes for everyone. To accomplish this mission we:

- Assist lake groups and lake users in their efforts to carry out our mission
- Help local leaders defend, manage, and restore lakes and their watersheds
- Provide a unified voice for public policy that will protect and preserve lakes
- Advance public knowledge of lakes, their watersheds, and ecosystems

Madison
WI 53703
Tel: 608.256.1250
Fax: 608.256.1177
www.wi-citizenaction.org

Staff: 16
Members: 74000

Mission Statement:

Wisconsin Citizen Action is a statewide public interest organization dedicated to social, economic and environmental justice for all. We unite the political power of our members with the power of a diverse coalition to: win improvements that matter in our daily lives, give people a sense of their own power to shape the future, and alter the relations of power to favor people over wealthy special interests. Our strategy is to build majoritarian power around issue and electoral campaigns.

934 North Main
Sheridan
WY 82801
Tel: 307.672.5809
Fax: 307.672.5800
www.powderriverbasin.org

Mission statement:

Powder River Basin Resource Council is committed to: The preservation and enrichment of Wyoming's agricultural heritage and rural lifestyle.

The conservation of Wyoming's unique land, mineral, water, and clean air resources consistent with responsible use of those resources to sustain the livelihood of present and future generations.

The education and empowerment of Wyoming's citizens to raise a coherent voice in the decisions that will impact their environment and lifestyle.

Powder River Basin Resource Council is committed to the empowerment of people through community organizing. More than ever, it is crucial that Wyoming's voice for responsible development, PRBRC, be a part of the debate that will determine Wyoming's future.
